**Background**

Information about the recent escalations in Gaza is summarized in Anera’s last [Situation Report (May 2023)](https://www.anera.org/).  

**Overview**

In the early morning on Monday, June 19, Israeli forces killed four Palestinians and wounded 91 others during a raid of the Jenin refugee camp in the West Bank.1 Two of the Palestinians killed were members of the armed Islamic Jihad group.2 The Palestinian Ministry of Health identified the four victims, including one 15-year-old Palestinian boy.3 Seven members of the Israeli border police and army sustained moderate injuries, according to the Israeli military.4

Israeli forces used stun grenades, live ammunition, and toxic gas during the June 19 raid conducted to arrest two suspects.5 While the Israeli military exited the camp, an explosive device hit one of their vehicles and crossfire broke out between Israeli forces and armed Palestinian groups. The explosion prompted an aerial attack from an Israeli Apache helicopter, which is one of the most recent documented uses of an Israeli attack helicopter in the West Bank since the second intifada.6 While Israeli forces withdrew from Jenin camp, they remained stationed on the outskirts of the camp.7

**Raids in Jenin**

This escalation follows multiple violent conflicts in the Jenin refugee camp, including the large-scale raid on January 26 [see our Timeline of Crises in Palestine](https://www.anera.org/), which resulted in the deaths of nine Palestinians within the camp and one death in the hospital caused by wounds sustained during the raid.8 One of the Palestinians killed was associated with an armed Palestinian militia group, according to group officials.9 On the

same day, Israeli forces shot and killed another Palestinian man in al-Ram, north of Jerusalem, making it one of the deadliest days in the West Bank this year. Following the January 26 raid, the Palestinian Authority paused security coordination with Israel. OHCHR and EU officials expressed concern with the escalating violence in Jenin after the raid.

Three additional escalations occurred during March, with 13 Palestinians killed by Israeli forces during raids in the city of Jenin. A raid on March 16 came a day after the Palestinian Authority said it would engage in a security meeting with Israel on March 19. On May 29, one Palestinian was killed, six Palestinians were wounded and another six were arrested during an Israeli raid of the Jenin refugee camp. The series of raids on the Jenin refugee camp in the past few months represent the ongoing and increasingly deadly escalation of tensions between Israeli forces and Palestinian groups in the West Bank. One hundred twelve Palestinians have been killed in the West Bank and East Jerusalem by Israeli forces between January 1 and May 29, 2023.

Emergency Medical Aid
Escalations pose a significant threat to civilians, especially in regard to receiving necessary medical aid. Ambulances have been reported to be blocked or damaged by Israeli forces while attempting to assist injured Palestinians in the West Bank. Nibal Farsakh of the Palestine Red Crescent Society claimed Israeli forces directly targeted four ambulances following the June 19 raid.

Military Checkpoints, Restrictions and Demolitions
Israeli-imposed mobility restrictions in the West Bank, including military checkpoints and separation walls, continue to harm the Palestinian economy and prevent necessary resources from reaching vulnerable communities. Approximately 1.8 million people in the West Bank and Gaza are food insecure (90% of whom are in Gaza). Limited access to basic services and worsening food security coincides with the demolition of

Palestinian homes and property by Israeli authorities in the West Bank, which further undermines Palestinians’ livelihoods. In the first quarter of 2023, 290 structures were demolished or seized and 413 people displaced in the West Bank, which represents a 46% and 78% respective increase from the first quarter of 2022.  

**Anera’s Response**  
Anera continues to monitor recent escalations in the West Bank and is prepared to provide emergency relief. Anera has decades of experience in delivering aid, including medicines, medical supplies, food and hygiene vouchers, and other needed assistance. Anera aims to ensure that families affected by escalations are able to maintain their dignity and meet their food security and nutrition needs despite movement restrictions and other access challenges.
